On/Off Solenoid to Modulating Gas Train Conversion Kit

The modulating valve increases or decreases the amount of the gas flow to a burner without fully switching the burner off or on during a bake cycle.

Modulating kit works on both Natural Gas and Liquid Propane (LP) units. All components are UL/AGA/CGA/CSA approved. Simple conversion with instantaneous results; consistent bakes and fuel efficiency.

Kit Includes:

- Instructions
- Modulating Temperature Controller
- Modulating High Flame Valve
- 24V Transformer (with mounting screws)
- Modulating Control Board (with mounting screws)
- 1/2" NPT Nipple (with Teflon pipe sealant)
- Wiring harnesses for all components
